## doing business: simplified

Cargo Portal Services (CPS) has changed the way forwarders and airlines do business. Up to 25% of bookings for some carriers are now made through this portal. And even more are tracked through it.

Why? Because, it's easy, it's free and it's open 24/7.

As well as letting you make new bookings, CPS also lets you see all your current bookings – even those made by phone.

And because life is complicated enough, CPS gives you neutral access to multiple carriers.

## move your business on-line

In its first year, over 1,000 forwarder companies in 34 countries moved to on-line business through CPS.

As well as booking, CPS lets them track shipments to Cargo 2000 standards and to manage allocations and recurring space on-line.

You can register on-line. There are no contracts to sign and no charges to pay.

## catch the next wave: systems integration

Join the rush to integration between forwarder and carrier systems.

CPS offers the industry's first open-standard booking link between forwarder and airline systems. This means that once you make a booking on your system, it can be immediately sent to the carrier and confirmed.

CPS also communicates industry-standard messages like status and tracking between airline and forwarder systems.

No more duplication of data entry, fewer mistakes to sort out and less time on the phone. And, yes, it's all based on Internet technologies to make life easier for you.

## and it gets better...

Team CPS is busy developing new services to increase its value. These include:

- A facility for forwarders to enter direct shipper information as required by U.S. Customs.
- A recycle booking function that remembers previous bookings to simplify regular ones.
- The connection of many new carriers.

Join us and go with the flow.
